

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in this application.

Listing of Claims:

Claims 1-9 (canceled)

Claim 10 (presently amended): A computer drive securing system comprising:

a chassis, the chassis having at least one pinhole and at least one clip mounting ~~features~~ feature projecting outwardly from the chassis; and

a securing clip having at least one securing pin and at least one flexible tab for engaging said pinhole and said clip mounting feature of the chassis, respectively, said securing pin projecting through said pinhole and engageable with a computer drive supported on said chassis for securing said computer drive to said chassis.

Claim 11 (previously presented): The computer drive securing system of claim 10 wherein the clip mounting features are formed as a part of the chassis.

Claim 12 (canceled)

Claim 13 (previously presented): The computer drive securing system of claim 10 wherein the securing pins are of sufficient

size to be projected through the pinholes of the chassis and into at least one screw hole of the computer drive.

Claim 14 (previously presented): The computer drive securing system of claim 10 wherein the securing pins are formed integral with from the securing clip.

Claim 15 (previously presented): The computer drive securing system of claim 10 wherein the flexible tabs are formed integral with the securing clip.

Claim 16 (previously presented): The computer drive securing system of claim 10 wherein the flexible tabs are configured to be deflected by and engaged with the clip mounting features of the chassis.

Claim 17 (previously presented): A method of securing a computer drive to a chassis comprising the steps of:

sliding the computer drive into the chassis such that rails formed in the chassis engage grooves formed in the computer drive, and such that at least one screw hole on the computer drive aligns with at least one pinhole on the chassis;

aligning a securing clip having at least one securing pin and at least one flexible tab with the pinholes of the chassis;

passing the securing pin through the pinholes of the chassis and the screw holes of the computer drive such that the securing pin simultaneously engages the chassis and the computer drive; and

engaging the flexible tabs to at least one clip mounting bracket formed as part of the chassis such that the securing clip is removably fastened to the chassis thereby securing the computer drive.

Appl. No. 09/648,405
Amendment Dated March 1, 2004
Reply to Office Action of December 31, 2003

Claim 18 (presently amended): A computer drive securing system comprising:

a chassis, the chassis having at least one pinhole and at least one clip mounting feature, projecting outwardly from the chassis, formed as a part of the chassis; and

a securing clip having at least one securing pin and at least one flexible tab for engaging the pinhole and the clip mounting feature of the chassis, respectively, the securing pin projecting through the pinhole and engageable with a computer drive supported on the chassis for securing the computer drive to the chassis.

Claim 19 (canceled)

Claim 20 (previously presented): The computer drive securing system of claim 18 wherein at least one securing pin is of sufficient size to be projected through a pinhole of the chassis and into at least one screw hole of the computer drive.

Claim 21 (previously presented): The computer drive securing system of claim 18 wherein at least one securing pin is formed integral to the securing clip.

Appl. No. 09/648,405
Amendment Dated March 1, 2004
Reply to Office Action of December 31, 2003

Claim 22 (previously presented): The computer drive securing system of claim 18 wherein at least one flexible tab is formed integral with the securing clip.

Claim 23 (previously presented): The computer drive securing system of claim 18 wherein at least one flexible tab is configured to be deflected by and engaged with at least one clip mounting feature of the chassis.

Appl. No. 09/648,405
Amendment Dated March 1, 2004
Reply to Office Action of December 31, 2003

Claim 24 (presently amended): A computer drive securing system comprising:

a chassis, the chassis having at least one pinhole and at least one clip mounting feature projecting outwardly from the chassis; and

a securing clip having at least one securing pin formed integral to the securing clip and at least one flexible tab for engaging the pinhole and the clip mounting feature of the chassis, respectively, the securing pin projecting through the pinhole and engageable with a computer drive supported on the chassis for securing the computer drive to the chassis.

Claim 25 (previously presented): The computer drive securing system of claim 24 wherein at least one clip mounting feature is formed as a part of the chassis.

Claim 26. (canceled)

Claim 27 (previously presented): The computer drive securing system of claim 24 wherein at least one securing pin is of sufficient size to be projected through a pinhole of the chassis and into at least one screw hole of the computer drive.

Appl. No. 09/648,405
Amendment Dated March 1, 2004
Reply to Office Action of December 31, 2003

Claim 28 (previously presented): The computer drive securing system of claim 24 wherein at least one flexible tab is formed integral with the securing clip.

Claim 29 (presently amended): The computer drive securing system of ~~claim 18~~ claim 24 wherein at least one flexible tab is configured to be deflected by and engaged with at least one clip mounting feature of the chassis.
